

# FOREIGN RELATED LITERATURE TIME MANAGEMENT ON EDUCATION

*ISSN An International Peer-reviewed Journal usage of time by students in higher education institutions is related to their daily routines and .. The related literature showed that the time management attitude.*

SOCIAL Researchers have been studying the connection between social development and academic achievement for decades and have come to a startling conclusion: the single best predictor of adult adaptation is not academic achievement or intelligence, but rather the ability of the child to get along with other children Hartup, The lack of positive attention can cause tremendous behavior problems in children. Multimedia programs provide different stimuli in their presentations which include a number of elements some of which are Aloraini, , p. The close-ended questionnaires will provide with the data for further analysis and interpretation. The curriculum it seems is more a direction. According to Gallavan et al Teachers, especially at the novice level, are not aware of the vastly different worlds their students live in. It 14 covers a wide range of behavior that is agitated and without definite orientation, as well as behavior that is highly motivated and goal directed. The home environment also affects the academic performance of students. Students now have numerous options available to them when it comes to learning techniques. In recent times, students have found a need to seek employment while studying on a part-time basis due to financial constraints. Parental engagement that makes a difference. The school personnel, members of the families and communities provide help and support to students for the quality of their academic performance. This view that stimuli can prompt responses was the forerunner of what became known as stimulus-response S-R theory Elliot et al, PUPWebSite is replacing more expensive, traditional methods of doing things with a more streamlined and efficient online solution. The environment and the personal characteristics of learners play an important role in their academic success. Stringfield and Teddlie , Ejiogu, was of the view that in order to improve on any aspect of education, it is therefore imperative to involve a well articulated teacher education programme that will prepare the teacher for the leadership role they are expected to play. Likewise, the accessibility of information will be implemented by using this online system. It is mostly because of inefficiency in time management. These are the following: 1 Compatibility. Learning Theories. However, studying in such universities is not easy and demands certain skills, for instance, time management. Responsibility for Learning Outcomes speaks to how parents can support the language and literacy development of their children through direct parent-teaching activities such as reading aloud and engaging in linguistically rich conversations with their children. However, it is also right to mention that technologies are also a major distraction for students. Skinner proposed that reflexive behavior accounts for only a small proportion of actions. Additional information on the effectiveness of classroom-based physical activity programs on academic performance e. Although they regularly face situations that provoke anger, contempt, disgust, sadness, and frustration, to develop and maintain healthy relationships with their students teachers must find appropriate ways to express or inhibit their feelings in a classroom setting Hargreaves, Ozay, et. Theory of Educational Productivity by Walberg determined three groups of nine factors based on affective, cognitive and behavioral skills for optimization of learning that affect the quality of academic performance: Aptitude ability, development and motivation ; instruction 18 amount and quality ; environment home, classroom, peers and television Roberts, Teachers are expected to overcome all of these obstacles, yet have not been adequately educated to understand how these life circumstances affect the families they serve. And we are reducing media production and distribution costs by distributing relevant files online. According to Campbell and Svenson , time management refers to the way students manage their time in order to have better academic performance which is invaluable for academic success. Today, in light of years of research indicating that the physical and mental aspects 17 of the human experience are intertwined, most psychologists reject a rigid dualist position. SOCIAL From Wikipedia , the term psychosocial refers to one in psychological development in and interaction with a social environment. Educated parents can provide such an environment that suits best for academic success of their children. Durden and Ellis, controlled for student differences in background, ability and 9 motivation, and reported a nonlinear effect of attendance on learning, that is, a few absences do not lead to poor grades but excessive absenteeism does. Most student information systems in use today are server-based, with the application residing on a central computer server, and being accessed by client applications at various places
